

CONTRACT OPPORTUNITY

Planning student, graphics work

I run a land use planning practice serving clients across Ontario, and I have a steady stream of planning rationales and urban design reports that need strong visuals. Looking for a planning or urban design student to produce these on a contract basis. Remote, flexible hours, paid per project or hourly.

THE WORK

- Existing context maps
- Figure-ground diagrams
- Land use and zoning schedules
- Site and aerial analysis graphics
- Report layout in InDesign
- Massing and block concept diagrams

YOU SHOULD KNOW

- Illustrator and InDesign
- ArcGIS or QGIS
- AutoCAD
- SketchUp a plus
- An eye for clean, submission-ready work
- Some planning coursework or experience

HOW IT WORKS

You take direction from me on real, live files. I provide the planning content and data, you produce the visuals to spec. **Great fit for a co-op or upper-year student who wants portfolio work on actual applications.** Pay is negotiable based on experience.
